

PIA19+MRSS19 Munich Remote Sensing Symposium 2019

Dear ISPRS Foundation,

My experience at the conference PIA9+MRSS19 was very satisfactory. Since it was my first international conference, it allowed me to know a new country and meet people from several countries.

The participation at this event contributed to many aspects of both, my professional and personal life. Firstly, because I was able to present my work to the specialized community assistant to the congress, allowing me to practice speaking skills in front of an audience and receive suggestions and comments to improve the work. Secondly, I learned and updated about the current research in Image Analysis and Remote Sensing fields as well as knowing other applications and work topics of other research groups.

I am truly grateful to the Grants Evaluation Committee of The ISPRS Foundation for selecting me and allow me to live this great experience. I believe that these student supports are a great motivation to continue researching and continue contributing to the scientific community.
