

REPORT ON MY ACTIVITIES AT THE ISPRS 2022 CONFERENCE

Nice, France, 6–11 June 2022

Elisabetta Colucci

Below are reported all the activities and scientific tracks I had at the XXIVth Congress of the International Society for Photogrammetry and Remote Sensing in Nice, France, from 6th June to the 9th.

I arrived in Nice with the Geomatic group of Politecnico of Turin on the 6th of June at lunchtime. I followed the “*Cultural Heritage Documentation*” session (15.00 -16.30), in which I listened to many interesting contributions.

Then, I moved to the Forum Track “*Women in Remote Sensing*”, and at the end of the session, I met Marguerite Madden, and I received my award (see photos).

Finally, we followed the plenary session, “*Opening Ceremony*”, and the Icebreaking party in the exhibitors’ room after this. I discovered many new and innovative tools and instruments and met the Korean delegation (It was hilarious! 😊 see the picture below).

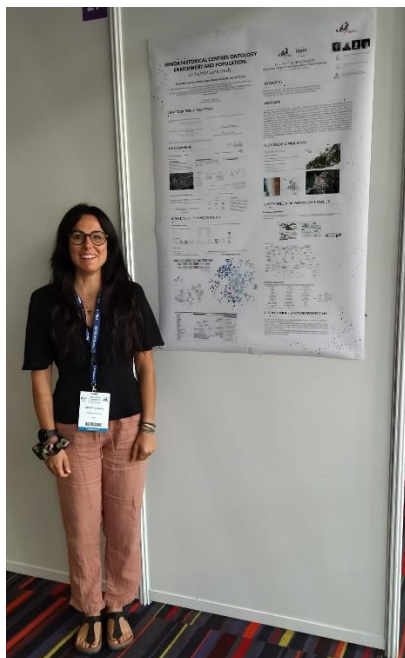

On Tuesday 7 morning, I joined the sessions “*Point cloud processing*” and “*Geovisualisation and extended reality*”, and during the break, I visited the exhibitors’ stands with really interesting innovative instruments.

After lunch with other researchers, I loved the “*posters session*”, where I met many fascinating contributors (even if it was a bit crowded). Then, I moved to the “*Cultural Heritage Forum*”.

On Wednesday, I joined “*Digital Twin*” and “*Point cloud processing sessions*”. In the afternoon, after the *Plenary*, I had my *Poster presentation* in which I shared my work with many young researchers.

On Thursday morning, I followed the “*Openess and Innovation in geomatics and earth observation*” forum track. I appreciated the presentation of Marco Bernasocchi.

After lunch, I took a photo with all the people of the Italian delegation in Nice. Then I left for Turin.

A handwritten signature or logo consisting of stylized, cursive letters.

During the Congress, I also promoted the SUNRISE Summer School I'm organising with Politecnico of Turin and promoted by the ISPRS SS consortium.

11th July 2022
