

# Report on Attending ISPRS GSW2023

Dear ISPRS TIF,

I am writing to express my gratitude for the travel grant to attend the ISPRS GSW2023 conference held in Cairo, Egypt from September 2nd to September 7th, 2023. This opportunity was made possible by the ISPRS TIF and my supervisor Prof. Xinlian Liang. It has been an enriching experience that has significantly broadened my professional and cultural horizons.

The conference covered a wide range of hot topics, including Satellite Remote Sensing and Its Applications, Robotics for Mapping, Laser Scanning, Smart Forests, etc. It was a platform for researchers, professionals, and students, to discuss and share their latest advancements in various fields. In addition, it also provided a platform for networking with leading experts and peers from around the world. The chance to listen to reports from these top experts and other attendees was invaluable. Their insights and experiences provided a unique perspective on the practical applications and challenges of implementing new technologies, which have significantly influenced my future research.

Beyond the conference, the experience of being in Cairo was equally enriching. I was captivated by the rich history and vibrant culture of Egypt, such as the Pyramid, Sphinx, and Citadel of Saladin.

In conclusion, the ISPRS GSW2023 conference was a significant experience both professionally and personally for me. I am deeply grateful to ISPRS TIF for the travel grant that makes this opportunity possible. And look forward to applying the knowledge and insights gained from this conference to my future work and research.

Once again, thank ISPRS TIF for the generous support.

Best Regards,  
**Xiaochen Wang**
