

ISPRS SC presentation at National Institute of Technology, Kurukshetra

ISPRS SC Board of Directors are continuously engaged in promoting the activities of ISPRS SC while sharing their knowledge on the applications of geospatial technologies, photogrammetry and remote sensing. Our Website Administrator, Mr. Yogender Yadav recently participated at an online event, 2nd Boot Camp on Applications of Drones in Mapping, organized from October 27 to 31, 2023 under the MeitY Project by the Electrical Engineering Department at the National Institute of Technology, Kurukshetra and gave a presentation about the activities of ISPRS SC and how can students be involved in its activities while getting benefits in terms of learnings and knowledge sharing on 29th October 2023. He also delivered a keynote lecture on the 'Applications of UAVs and Airborne Multisensor Datasets'. The event had an active participation of around 55 people belonging to a diverse group of professionals, researchers, and students keen on exploring the potential of unmanned aerial vehicles (UAVs) and multisensor datasets in different mapping applications. This session also included a talk on 'Applications of Drones in Agro-Forestry' by Mr. Arvind Gauns, a Ph.D. researcher from Max Planck Institute, Jena, Germany where he discussed the applications of drone datasets for agriculture and forestry applications.
