

The **3D GIS Research Group** at the Universiti Teknologi Malaysia (JB campus) gathers several international researchers. They focus on three-dimensional Geographical Information Systems (3D GIS); this includes city and building modelling, cadastre, spatial analysis and many more. The group can boast many successful research projects, completed and ongoing. New projects address scale management and spatio-topological modelling using new data structures.

3D GIS Research Group invites applicants for a post doctoral fellowship in the field of nD spatial modelling

Selection criteria:

Essential

- A Ph.D.-degree in an appropriate field (computer science, spatial information, geoinformation, etc.)
- Good oral and written communication skills (English)
- Good programming skills are essential

Desirable

- Experience in publishing in international peer-reviewed journals and international conference proceedings
- Ability to work independently as well as within a multidisciplinary team

Terms of appointment:

1. The tenure for the post-doctoral fellowship is one year (subject to research performance).
2. Monthly allowance is between RM 5,000-RM 7,000 based on candidate skills and experience.
3. Travel expenses will be covered by UTM (economy class return only).

How to Apply

To apply for this post or to obtain more information about the research project, please send an e-mail to Dr. Pawel Boguslawski (pawel@utm.my) with a copy of your CV.
