

Joint International Conference and exhibitions on Geomatics-2011 and ISPRS Conference on Data Handling and Modeling of GeoSpatial Information for Management of Resources

The Joint International Conference and exhibitions on Geomatics-2011 and ISPRS Conference on Data Handling and Modeling of GeoSpatial Information for Management of Resources was organized on 15-16 May 2011 at the National Cartographic Centre of Iran, Tehran. The event was jointly organized by, National Cartographic Centre of Iran, ISPRS WG II/7 "Spatial Decision Support Systems and Location Based Services, ISPRS WG II/4 - Uncertainty Modelling and Quality Control for Spatial Data, Iranian Space Agency; KNTU University of Technology, and Tehran University.

Theme of the conference was "Geomatics from data acquisition to solving real world problems". It included 9 invited keynotes, 103 papers, organized in 24 sessions in which 3 was dedicated to ISPRS themes, and 176 poster presentations. The ISPRS WG II/7 also organized a one day workshop on "GI Product Development" which was carried out by Gerhard Navratil, Vienna University of Technology. Out of the ISPRS papers 12 were selected for published in an special issue of the International Journal of Applied Earth Observation and Geoinformation "JAG". These papers have been sent for the second review.
