

Asia GIS Conference 2017

Future Smart Cities

asiaGIS
HONG KONG 2017

Asia GIS Conference is a biannual conference organized by Asia Geographic Information System Association (AGISA) for GIS academics and professionals in the Asia-Pacific region. Since 1994, it has provided a multidisciplinary network and forum for people involved in GIS teaching, research, development and applications to interact with each other and exchange ideas, information and achievement on the latest advancements / issues in the rapidly changing technology.

Themes:

- GIS for environmental resources & management
- Geo-big data management and mining
- Spatio-temporal statistics and analysis
- GIS for transportation applications
- Location based services (LBS)
- GIS for geo-spatial services
- GIS and sustainable city
- GIS for urban planning
- GIS and Education
- Real-time GIS

Keynote Speakers:

Prof. Li Deren

Wuhan University, China

Prof. Michael Batty
