25 - 29 OCTOBER 2018
EARTH OBSERVATIONS AND GEOSPATIAL SCIENCE IN SERVICE OF SUSTAINABLE DEVELOPMENT GOALS

CONFERENCE THEMES:

- Big data and data mining of geospatial data.
- High-Performance Computing for geospatial data analysis.
- Climate changes implications on sustainable development.
- Remote sensing of oceans and coastal zone management.
- Space technologies and geospatial sciences for early warning systems.
- Space and geospatial science for sustainable development goals.
- Influence of African space policy on youth generation in Africa.
- Applications of advanced remote sensing technologies (LiDAR, Hyperspectral) in Africa.
- Remote Sensing and GIS for natural resources management.
