

Workshop Organization

The workshop was organized by the following Working Groups and Organizations:

ISPRS WG III/5 Remote Sensing and Vision Theories for Automatic Scene Interpretation

Chairs: B. Csatho, Byrd Polar Research Center, OSU, Columbus, OH, USA
D. Wang, Computer and Information Science, OSU, Columbus, OH, USA

ISPRS WG III/2 Algorithms for Surface Reconstruction

Chairs: A. Krupnik, Israel Institute of Technology, Haifa, Israel
C. Toth, Center for Mapping, OSU, Columbus, OH, USA

Cecil H. and Ida M. Green Institute of Geophysics and Planetary Physics (IGPP)

B. Minster, Scripps Institution of Oceanography, La Jolla, CA, USA

Scientific Committee

B. Csatho, chair, Byrd Polar Research Center, OSU, Columbus, OH, USA
M. Hofton, University of Maryland, College Park, MD, USA
A. Krupnik, Israel Institute of Technology, Haifa, Israel
B. Minster, IGPP, Scripps Institution of Oceanography, USA

Preface

Airborne and spaceborne laser ranging is a rapidly emerging technology for capturing data on physical surfaces. An ever increasing range of applications takes advantage of the dense sampling, the high accuracy, and the direct way to obtain 3-D surface points that characterizes laser ranging methods. The objective of the workshop **Mapping Surface Structure and Topography by Airborne and Spaceborne Lasers** was to bring together researchers, developers, and users of airborne and spaceborne laser altimeter systems, to present results, and to discuss issues related to deriving surface properties from laser ranging data.

The three-day event brought together 56 participants with different backgrounds, expertise, and affiliations. The interdisciplinary audience engaged in lively discussions with the 25 presenters of papers, ranging in content from theoretical and conceptual topics to applications. Nearly all presentations are contained in this volume, organized in the sequence of the workshop sessions. The workshop was hosted by the **Cecil H. and Ida M. Green Institute of Geophysics and Planetary Physics, Scripps Institution of Oceanography**, in La Jolla, California.

Originally, it was planned to include a synopsis of the discussion that took place at the end of the workshop. Although we took copious notes of the discussion I have decided against including a synopsis as it may not be relevant for readers who did not participate. The opinion expressed most often was to continue with this kind of workshop; and to establish test sites, conduct, and coordinate tests with laser ranging data.

I thank all authors for their very valuable contributions and all participants who contributed to the success of the workshop. I am sure the readers will find the proceedings a valuable source of information.

Beáta M.Csathó

Editor

Contents

- ii Workshop Organization
- iii Preface

OPENING SESSION

- 3 **Photogrammetry and laser altimetry**
Schenk, T.
- 13 **Commercial development of airborne laser altimetry - A review of the commercial instrument market and its projected growth**
Flood, M.

SESSION 1 FOREST TOPOGRAPHY AND CANOPY MAPPING I

- 23 **Progress in LIDAR altimeter remote sensing of stand structure in deciduous and coniferous forests using SLICER data**
Lefsky, M., D.J. Harding, G. Parker, W.B. Cohen and S.A. Acker
- 31 **Interpolation of high quality ground models from laser scanner data in forested areas**
Pfeifer, N., T. Reiter, C. Briese and W. Rieger

SESSION 2 GEOLOCATION OF LASER FOOTPRINT

- 39 **Analysis of satellite laser altimetry range measurements over land topography using generalized attitude parameter extraction**
Ridgway, J. R. and J. B. Minster
- 47 **A novel approach for calibrating satellite laser altimeter systems**
Filin, S. and B. Csatho
- 55 **A new approach for matching surfaces from laser scanners and optical sensors**
Habib, A. and T. Schenk

SESSION 3 SURFACE RECONSTRUCTION BY USING RETURN WAVEFORMS

- 65 **Processing of shuttle laser altimeter range and return pulse data in support of SLA-02**
Carabajal, C.C., D.J. Harding, S.B. Luthcke, W. Fong, S.C. Rowton and J.J. Frawley
- 73 **Segmentation of laser surfaces**
Csatho, B., K.L. Boyer and S. Filin
- 81 **Application of the Shuttle Laser Altimeter in an accuracy assessment of GTOPO30, a global 1-kilometer Digital Elevation Model**
Harding, D.J., D.B. Gesch, C.C. Carabajal and S.B. Luthcke

SESSION 4 COMBINED APPLICATION OF LASER SCANNING & PHOTOGRAMMETRY

- 89 **Utilizing airborne laser altimetry for the improvement of automatically generated DEMs over urban areas**
McIntosh, K., A. Krupnik and T. Schenk
- 95 **Registration of airborne laser data to surfaces generated by photogrammetric means**
Postolov, Y., A. Krupnik and K. McIntosh
- 101 **Quality control issues of airborne laser ranging data and accuracy study in an urban area**
Schenk, T., B. Csatho and D.C. Lee

SESSION 5		INTEGRATION OF LIDAR WITH OTHER SENSORS	
111	Integration of high resolution multispectral imagery with LIDAR and IFSAR data for urban analysis applications	Gamba, P. and B. Houshmand	
119	Integration of LIDAR, Landsat ETM+ and forest inventory data for regional forest mapping	Lefsky, M.A., W.B. Cohen, A. Hudak, S.A. Acker and J.L. Ohmann	
127	Comparison of DEMs from STAR-3i interferometric SAR and scanning laser	Mercer, J. and S. Schnick	
SESSION 6		RECOGNITION AND RECONSTRUCTION OF MAN-MADE OBJECTS	
137	The use of laser scanner data for the extraction of building roof detail using standard elevation derived parameters	Chilton, T., J. Jaafar and G. Priestnall	
145	Laser data for virtual landscape generation	Haala, N. and C. Brenner	
151	The effects of LIDAR DSM grid resolution on categorising residential and industrial buildings	Jaafar, J., G. Priestnall and P.M. Mather	
SESSION 7		MAPPING OF ICE SHEETS AND GLACIERS	
161	Application of aircraft laser altimetry to glacier and ice cap mass balance studies	Abdalati, W. and W.B. Krabill	
167	Airborne laser altimetry over the central West Antarctic ice sheet	Blankenship, D.D., S.D. Kempf, D.L. Morse, M.E. Peters, R.E. Bell and R.B. Arko	
169	Airborne laser profiling of Antarctic ice stream for change detection	Spikes, B., B. Csatho and I. Whillans	
SESSION 8		FOREST TOPOGRAPHY AND CANOPY MAPPING II	
179	Estimating individual tree heights of the boreal forest using airborne laser altimetry and digital videography	St-Onge, B.A.	
185	Roads and buildings from laser scanner data within a forest enterprise	Rieger, W., M. Kerschner, T. Reiter and F. Rottensteiner	
193	Laser-scanning for the derivation of forest stand parameters	Rieger, W., O. Eckmüllner, H. Müllner and T. Reiter	
201	Design, capabilities and uses of large-footprint and small-footprint LIDAR systems	Means, J.	
209	Conference Program		
215	List of Participants		
219	Author Index
