

## ISPRS Book Series

### Announcement of Opportunity for ISPRS meeting organizers

---

#### Operation of the Series

The *ISPRS Book Series in Photogrammetry, Remote Sensing and Spatial Information Sciences* comprises significant scientific publications in photogrammetry and remote sensing, and related disciplines. Each volume in the series is prepared independently and focuses on a topical theme. Volumes are published on an occasional basis, according to the emergence of noteworthy scientific developments. The material included within each volume is peer-reviewed rigorously, ensuring strong scientific standards. While volumes are published on any suitable theme, it is common for themes to be related to ISPRS meetings. Volumes may vary markedly in character, but are often (i) extended proceedings (papers selected from an ISPRS meeting), (ii) edited volumes (papers invited on a particular theme), (iii) text books (general overview of a significant subject) or (iv) monographs (in-depth study on a specific topic). The series is published by Taylor & Francis.

#### ISPRS meeting organizers

A primary aim of the ISPRS Book Series is to generate very high quality scientific publications *related to ISPRS events*. Therefore, a clear opportunity exists for organizers of ISPRS workshops, symposia and other technical meetings to publish a volume in the Book Series on the theme of their meeting. ISPRS meeting organizers are encouraged strongly to consider editing a volume in the Book Series. For further information, please visit the ISPRS Book Series website (<http://www.isprs.org/publications/bookseries.html>) or email the ISPRS Book Series Editor ([paul.aplin@nottingham.ac.uk](mailto:paul.aplin@nottingham.ac.uk)).

#### Publication schedule

It should be noted that the timescale over which a volume is produced can be lengthy, often over a year, so preparations must begin well in advance of the proposed date of publication. This is particularly significant where a specific deadline exists, such as the dissemination of volumes at an ISPRS meeting. As such, prospective volume editors are encouraged to contact the ISPRS Book Series Editor at the earliest opportunity.
