

A-5 SCHERMERHORN AWARD

Purpose

Promotion of the international of activities in the various areas of specialization in photogrammetry and remote sensing.

Information :

The ISPRS is made up of Commissions and Working Groups all sharing the above purpose. The internationalization of research, however, is carried out mainly at Working Group level. Every two years the Commissions organize events (Congresses/Symposia), the results of which depend very much on the input of the Working Group members. They form the key to the functioning of the ISPRS.

Criteria for the award :

The Schermerhorn Award is granted to Working Group member (or to more than one person, if the Jury is unable to select a single winner from the suitable candidates) who, through his/her commitment, has achieved extremely worthwhile and successful scientific meetings of a very high level, gaining sufficient interest (participation by several countries) and good reporting throughout the 4 year period up to the ISPRS Congress¹

Jury :

ISPRS President

Chairman of the Federation of Remote Sensing and Geoinformatics 3 Representatives of Delft Technical University, Agricultural University and ITC.
