A Combination of SegNet and Random Walk for Semantic Segmentation of Vaihingen 2D Images

Chengjin Lyu and Jie Jiang

Beihang University (BUAA), P.R. China

In this work, we make full use of SegNet for 2D Semantic Labeling Contest of Vaihingen dataset. Random walk is utilized to improve the accuracy. Only IRRG images are used in this work, and 4 tiles (image numbers 5, 7, 23, 30) are removed as a validation set. Paper will come soon.
