

Dear Senthil and the ISPRS Committee,

Thank you for your kind email and the gentle reminder. I have safely returned home, and I am writing to express my deepest gratitude for the incredible experience I had during the ISPRS Congress 2026 in Toronto.

Attending the Congress at the Metro Toronto Convention Centre was a profound milestone in my academic career. As a Ph.D. candidate and Research Assistant in the Photogrammetry Division at Hacettepe University, being part of such a globally recognized scientific gathering was truly inspiring. The event provided an exceptional platform to dive deep into the latest advancements in remote sensing, photogrammetry, and deep learning applications.

The opportunity to engage with leading experts, exchange innovative ideas, and discuss current methodologies has significantly broadened my research perspective. The sessions were not only highly informative but also sparked new ideas that I am eager to integrate into my ongoing research projects. Furthermore, the networking opportunities allowed me to build meaningful connections with fellow researchers and professionals from all around the world, which I believe will lead to fruitful future collaborations.

I am profoundly grateful to the ISPRS Foundation and the youTIF program for their generous support, which made my participation in this memorable event possible. The entire process, from the initial award notification to the closing ceremonies in Toronto, was flawlessly organized and deeply enriching.

As requested, I have attached a couple of photos from my time at the Congress to this email. Please feel free to use them and this feedback for the official ISPRS publications.

Thank you once again for this life-changing opportunity.

Best regards,

Melih Altay

Ph.D. Candidate & Research Assistant Photogrammetry Division, Geomatics Engineering
Department Hacettepe University
