

6th International Conference on
Recent Advances in Space Technologies
New Ways of Accessing Space for Benefit of Society

RAST 2013

12-14 June 2013, İstanbul, TÜRKİYE

www.rast.org.tr

In view of the interesting and amazing new space developments, Aeronautics and Space Technologies Institute of Turkish Air Force Academy, İstanbul, Turkey initiated in the year 2003 a conference series, under the title; Recent Advances in Space Technologies-RAST.

RAST conferences have become a general forum for the presentation of recent developments in space technologies and it have also become one of the major event in space conferences in this area of the world.

The sixth RAST Conference, RAST2013, will be held again in İstanbul on 12-14 June 2013. RAST Conferences are open to all areas of space, but each conference has a different theme. RAST 2013 will carry the theme: NEW WAYS OF ACCESSING SPACE FOR BENEFIT OF SOCIETY.

RAST2013 intends to elaborate on the benefits, accomplishments, plans and the potential of space technologies in terms of development, environment, health, education and disaster mitigation, especially for the developing World.

RAST2013 has the main objective of providing a forum for the presentation and review of recent developments in space technologies especially emphasizing the new ways of accessing space for benefit of society. It is the wish and the goal of the organizers to make RAST 2013 a premier event in space technology developments especially those on the way to near future deployment.
