**REPORT ON ATTENDANCE OF THE INTERNATIONAL SOCIETY FOR
PHOTOGRAMMETRY AND REMOTE SENSEING CONGRESS 2016 IN PRAGUE**

I am grateful for the travel grant provided by the ISPRS Foundation (TIF), which made it possible for me to attend the XXIII ISPRS congress at Prague earlier this year. The conference was well organized and it was a huge success with a lot of attendees from different part of the world. It was a great feeling for me to attend as well.

I was able to meet, interact and exchange contacts with a lot of researchers and remote sensing practitioners from different walks of life. Likewise, the presentation of my paper gave me greater courage to address a bigger multicultural audience. The questions and feedback from the presentation has also helped shape my research going forward. Some points were raised, which I have taken into consideration in my doctoral study.

Attending the congress also gave me the opportunity to experience and explore a new city, which I indeed enjoyed. I am looking forward to the next congress in Nice, France.

Sincerely

A handwritten signature in black ink, appearing to read 'Adedayo'.
