

## Report from GRASF

Hussein Mohammed Abdulmuttalib, on behalf of the Dubai Municipality organized GIS & Remote Sensing Annual Scientific Forum = GRASF (<http://www.grasf.ae>).

Organizers hosted not only the GRASF meeting, but also [JURSE 2017](http://www.jurse2017.com) (<http://www.jurse2017.com>), Joint Urban Remote Sensing Event within the scientific programme. It allowed them to welcome many more important scientists from all over the world. ISPRS was presented by IPAC Chair – Gunter Schreier, two Honorary Members – Deren Li and Orhan Altan, Lena Halounova and other ISPRS officers and scientists who were nominated to plenary sessions. The hospitality, the warm welcome offered by the organizers, the beautiful area of the hotel at the sea coast and the warm sea framed the meeting which was an interesting and pleasant stay in Dubai at the beginning of March 2017.
