

## **Report of My Experiences at the ISPRS Commission III Symposium**

**Dr. Md. Surabuddin Mondal**

Thanks to a travel grant by ISPRS to attend ISPRS Technical Commission III Symposium 2018, Beijing, China, where I have chaired one technical session and one poster session. Besides that, I attended several paper presentation sessions, invited talks and live discussions and questions answers. Also attended two days' business meeting as a member (secretary) of our Working Group **ICWG III/7: Landuse and Landcover Change Detection** with our group Chair Prof. Ammatzia Peled and Co- Chair Prof. Yongnian Zeng. Attending ISPRS Technical Commission III Symposium 2018, and enjoying the talks, meeting fellow researchers and engaging in interesting discussions has been an amazing experience for me and it opens up new avenues for research and collaborations. I am looking forward to attend others ISPRS conferences, workshop, symposium again in future and keep on learning and engaging with the ISPRS community. Thank you again ISPRS for travel grant.
