

ISPRS TIF Travel Grant Report

ISPRS Technical Commission V - Education & Outreach
 Geospatial Technology – Pixel to People
 Indian Institute of Remote Sensing, Dehradun, India, November 20-23, 2018

Mehmet Büyükdemircioğlu (mbuyukdemircioglu@hacettepe.edu.tr)

Hacettepe University, Department of Geomatics Engineering

As a young researcher and currently a PhD candidate, i would like to thank The ISPRS Foundation for supporting me with the travel grant and make it possible for me to attend my first international conference. Also, i would like to thank my professor Dr.Sultan Kocaman for encouraging me to attend the conference and advising me to apply for TIF travel grant.

Attending this symposium provided me a lot of beneficial information for my doctoral research and my future academic career. During the conference, i learned alot about new trends in Geomatics and also had chance to talk with many researchers. I gained experience through the discussions at the end of oral presentations in different sessions. It was a great opportunity for expading academical network and exchanging knowledge with researcher from all over the world.

I also would like to thank the conference organizers and Dr. Senthil Kumar for providing accommodation and their amazing hospitality. It was also a lifetime experience for me to experience Indian culture. It is always overwhelming for me to communicate with people with diffrent cultural background. I am looking forward to attend ISPRS workshops and conferences, especially the ISPRS Congress that will be held in Nice, France.
