

I wanted to take a moment to thank you for The ISPRS Foundation and ISPRS Geospatial Week 2019 organizers. I cannot tell how much it means, as one of TIF Grant 2019 recipients to have financial support to come the conferences through the TIF Grant Award.

This is my first time participating in the ISPRS international Conference, and it's my pleasure and honor to contribute and joint this event. This conference related to my research in photogrammetry especially in the field of UAVs. I am excited to attend this event, it afforded me a greater understanding of the significant contribution conferences can make to my professional development. I also attended the Tutorial-Workshop "Deep learning for geospatial data analysis", one day before the conference. This workshop greatly improved my understanding of Deep Learning topics, and allowed me to learn with the instructors and other participants. My practical experience gained during this workshop.

Special thanks are also extended to John Trinder as Operations Officer The ISPRS Foundation, Francesco Nex (University of Twente) as local organizing chair, and my supervisor Jiann Yeou Rau, Laboratory of Cyber City, National Cheng Kung University, Taiwan, for their generous support in the application process.

Thank you so much for this opportunity. I am truly grateful to ISPRS Foundation for the opportunity to attend this year's conference.

Ruli Andaru

Winner Best Poster Award-UAVg GSW 2019

1. *Lecturer and Researcher*
Geodetic Engineering, Gadjah Mada University
2. *Ph.D student at Geomatics Department*
National Cheng Kung University, Taiwan
