### About the GeoMixer

The GeoMixer monthly event is a new opportunity to network with other remote sensing scientists at all career stages from around the world! This virtual mixer supports networking with other participants that you may not have otherwise met by assigning participants into a series of small breakout rooms in Zoom. This event is inspired by the International Association for Landscape Ecology - North America (IALE-NA) 2020's Student Mixer and the successful first GeoMixer event at Google's Geo for Good Summit 2020.

This event is organized by the [Ladies of Landsat](#), [Sisters of SAR](#), [MS IEEE-GRSS](#), [IEEE-GRSS IDEA](#), [ASPRS Student Advisory Council](#), the [Asian Association on Remote Sensing](#) and the [ISPRS Student Consortium](#)!

The kick-off event was led by the Ladies of Landsat and was hosted last January 6 and we were joined by about 47 attendees from different countries in Asia, North America, South America, Africa and Europe. The next event was hosted by the Sisters of SAR last February 17 and we were joined by about 45 attendees. Our participants were composed of students and early career researchers to senior scientists, as well as participants from the ISPRS and ISPRS White Elephant Club.

The GeoMixer is an incredible opportunity to make new friends in the remote sensing community, find other researchers working in the same geographical study area, topic or using similar remote sensing techniques and expand your professional networks. This event demonstrates the potential of positive collaborations among organizations in remote sensing and is a place where you can meet some of the rising stars in remote sensing and geospatial information, professors and members of the academia, industry experts, students and early career researchers.

### Upcoming Event

The next GeoMixer is scheduled on **March 18, 11 AM UTC**, Thursday, and it's the ISPRS SC's turn to host! Convert to your local time [here](#).

If you are interested in joining the upcoming GeoMixer or planning to join us in the very near future and would like to receive updates, sign up now!

**Register here: [bit.ly/3q3Mllm](https://bit.ly/3q3Mllm)**

We are excited to meet you soon! See you in the coming GeoMixer!

### About the Organizers

The ISPRS Student Consortium (ISPRS SC) represents a constituency of the students and the young professionals with common interests and goals within the ISPRS in the areas of photogrammetry, remote sensing and spatial information science. (Twitter: @ISPRS\_SC, Website: <http://sc.isprs.org/home.html>)

The Ladies of Landsat is an inclusive and supportive network for all who personally identify with our community. We work towards elevating our members by increasing awareness of their awesome remote sensing research and supporting those who need a voice. (Twitter: @LadiesOfLandsat, ISPRS SC SpeCtrum Women in Remote Sensing and Geospatial Information Special Issue: <https://drive.google.com/file/d/1ZJXBQi9HkXyS7E06Uo8DFTfmYiljFVdR/view>)

MS GRSS IEEE Student Branch Chapter is a student group at Federal University of Mato Grosso do Sul - Brazil from IEEE - Geoscience and Remote Sensing Society (GRSS). Our main aim is develop activities in remote sensing to improve our technical expertise, encourage local students and from other regions in this area, and share our work with all those interested in remote sensing. (Twitter: @MS\_IEEE\_GRSS)

The IDEA Program shall Inspire, Develop, Empower, and Advance (IDEA) all GRSS members and affiliates of accredited societies who are interested in the fields of interest of the Geoscience and Remote Sensing Society (GRSS). We celebrate, support and thrive on our differences for the benefit of our members and our GRSS community. We also have a Women Mentoring Women Mentorship program that is open to women at all stages of their career. (Twitter: @GRSS\_IDEA, Website: <https://www.grss-ieee.org/community/groups-initiatives/idea/>)

Sisters of SAR (Twitter: @SistersofSAR) is a Twitter initiative that aims to showcase amazing #WomeninSAR and promote the accomplishments of #WomeninSTEM while sharing the exceptional advancements in SAR research around the world. (ISPRS SC SpeCtrum SAR Remote Sensing, Special Feature: [http://sc.isprs.org/files/sc/newsletter/ISPRS%20SC\\_Vol14\\_No3.pdf](http://sc.isprs.org/files/sc/newsletter/ISPRS%20SC_Vol14_No3.pdf))

The Student Advisory Council (SAC) is part of the American Society of Photogrammetry and Remote Sensing (ASPRS), and has offered great leadership opportunities for geospatial students to build confidence, step outside their comfort zones, and grow from their experiences.

Asian Association on Remote Sensing (AARS) is an Asian non-governmental organization dedicated to promote Remote Sensing through exchange of information, mutual cooperation and international understanding and goodwill amongst the member countries of Asia-Pacific Region. (Website: <https://a-a-r-s.org/>)
