

Joint International Symposium on Deformation Monitoring (JISDM) in  
Karlsruhe, Germany, 7 – 9 April, 2025

The organising commissions of FIG, IAG and ISPRS as well as the local organising committee of Karlsruhe Institute of Technology (KIT) invite to the **6<sup>th</sup> Joint International Symposium on Deformation Monitoring (JISDM) in Karlsruhe, Germany, 7 – 9 April, 2025.**

JISDM is dedicated to the latest developments in the field of deformation measurements and deformation analysis and brings together experts from the wide range of geodetic fields like photogrammetry, remote sensing, engineering geodesy and higher geodesy as well as from neighbouring fields at the interface of deformation monitoring.

Contributions may deal with the broad spectrum of deformation measurement and analysis. Hence, papers should present scientific aspects or applications regarding the deformation monitoring of natural objects and man-made structures. The individual presentations may be focused on pure theory, on practical aspects or on both.

Topics of interest include but are not limited to the following subject areas:

- Sensors and sensor systems
- Methods
- Applications

**Deadline for abstract submission is 15.07.2024.**

More details can be found on the conference website: <https://jisdm2025.gik.kit.edu/>
