

TC III Symposium feedback

This grant contributed to my participation in the conference, so I was very glad to receive it. In general, the congress was a great experience for me. It is just a pleasure to spend time with so many smart people from so many countries and cultures.

I participated in the DART course at Belem earlier during the weekend prior to the congress with professor Guiliespie. I was so honored to have this time with such a great legend.

The presentation of my work took place on Wednesday. There were few people in attendance at my presentation, which I found a little bit frustrating. Possibly, having too many workshops going on at the same time made attendance numbers low. Or maybe the subject was just not so popular.

Other than that, it was such a great time.

Thanks.

Sincerely

Nathan Goncalves
