ISPRS Commission V Symposium

Hakodate, June 2 - 5, 1998

## Real-Time Imaging and Dynamic Analysis

---

### Foreword

Japan is responsible for Technical Commission V of the International Society for Photogrammetry and Remote Sensing (ISPRS) for the period 1996 - 2000. Commission V covers the topics of Close-Range Techniques and Machine Vision. While it initially dealt with architectural recording and non-topographic photogrammetric mapping, Commission V now covers a much broader range of applications, by embracing digital imaging systems. The last four years (1992 - 1996) have been a period of great change in photogrammetry from analog to digital.

Digital photogrammetric imaging is becoming a useful tool in a number of fields, e.g. industry metrology, machine and robot vision, medical and sports science, archaeology, architecture and construction management. There are still, however, some issues which need to be solved before digital photogrammetry becomes operational. These problems include accuracy, measuring speed, imaging and recording, the handling of large volume of data, integration with position/attitude sensors etc.. In particular, integration of virtual reality, computer graphics, computer aided design and animation techniques with digital photogrammetry will become indispensable for the development of the future of Commission V.

We trust that 'Real-Time Imaging and Dynamic Analysis' will be of interest to you, and bring you up to date with the state-of-the-art of this topic.

Prof. Hirofumi Chikatsu  
President, ISPRS Commission V

Prof. Eiham Shimizu  
Secretary, ISPRS Commission V

**International Archives of Photogrammetry and Remote Sensing**  
**Volume XXXII, Part 5**

**Table of Contents**

**Key Note Lecture**

- Armin Gruen (Switzerland) 1  
**Real-Time Photogrammetry : The Fast Road to Virtual Worlds?**

**WG V/1: Close-Range Imaging and Metrology**

- Yukio Akamatsu, Masahiro Setojima, Yoshizumi Yasuda (Japan) 9  
**Discussion on the Relation between the Internal Transformation of Construction and Surface Temperature Jointly Using the Thermal Image and Heat Balance Model**
- Keiichi Akimoto (Japan), Clive S. Fraser (Austriaria), Hiroyuki Hasegawa, Susumu Hattori (Japan) 17  
**Comparison of Free Network Solutions by the Artificial Basis-Based Method with One by the Generalized Inverse in Video Metrology**
- Tianen Chen, R. Shibasaki (Japan) 23  
**Determination of Camera's Orientation Parameters Based on Line Features**
- T. Clarke, L. Li, X. Wang (United Kingdom) 29  
**3D-NET - A New Real-Time Photogrammetric System**
- Egon Dorrer, Jürgen Peipe (Germany), Randolph L. Kirk (United States), Rüdiger Kotowski (Germany) 35  
**Self-Calibrating Bundle Adjustment with Relative Orientation Constraints for Mars Pathfinder Stereo Images**
- Kenneth Edmundson, Clive S. Fraser (Australia) 39  
**Performance Evaluation of Sequential Estimation in Vision Metrology**
- C. S. Fraser (Australia), S. Hattori, A. Okamoto, N. Uno (Japan) 47  
**Vision-Based Dimensional Inspection of Freeway Bridge Blocks**
- Giuseppe Ganci, Harry Handley (United States) 53  
**Automation in Videogrammetry**
- Renyan Ge (Japan) 59  
**A Fast Algorithm of Solving Large Sparse Equations**

Renyan Ge (Japan)	63
