Benefits of being a member of ISPRS

- ISPRS is the international voice of photogrammetry, remote sensing and spatial information sciences.
- Representation in international organisations such as the United Nations, ICSU, GEO and CEOS.
- Access to an international scientific network through ISPRS Technical Commissions and Working Groups.
- ISPRS eBulletin with full information on all ISPRS organised meetings.
- Access to online publications and other resources on the ISPRS website.
- Reduced rates for books in the ISPRS Book Series.
- Free copy of ISPRS occasional publications such as the ISPRS video and ISPRS prospectus.
- Free panel for displaying National activities at ISPRS Congress.
- Reduced rates for a booth in the exhibition.
- The right to nominate individuals for ISPRS Awards.
- The right to host Technical Commissions and the ISPRS Congress.
- Information on activities of other societies and in some cases reduced rates.
- Individuals from member developing countries are given preference for funding from ISPRS Foundation for travel grants to ISPRS Congresses and Symposia.

Photogrammetry and Remote Sensing is the art, science, and technology of obtaining reliable information, from noncontact imaging and other sensor systems, about the Earth and its environment, and other physical objects and processes through recording, measuring, analysing and representation.

Spatial Information Science is the art, science, and technology of obtaining reliable spatial, spectral and temporal relationships between physical objects, and of processes for integration with other data for analysis, portrayal and representation, independently of scale.
The International Archives of the Photogrammetry, Remote Sensing and Spatial Information Sciences (ISPRS Archives) is the official peer-reviewed publication of the Society on geo-information. It is the official peer-reviewed publication of the Society on the science of Photogrammetry, Remote Sensing and Spatial Information Sciences. It includes high quality refereed papers on topics related to fundamentals, theory and applications of photogrammetry, remote sensing and spatial information sciences, and integrated solutions for data management and exploitation in various sectors of application.

ISPRS Book Series

Each Commission of ISPRS has several working groups which are responsible for particular topics within the Commission’s areas of responsibility. Full details can be found in: http://www.isprs.org/technical_commissions/default.aspx

ISPRS eBulletin

Frequently, the ISPRS eBulletin contains articles of interest to the ISPRS Members and the general public. It contains articles related to the activities of the Society through its initiatives, exchange programmes, international workshops, travel assistance and ISPRS Congresses.

ISPRS Congress

Each ISPRS Congress is organized by one of the Member organisations. The Congress elected by the General Assembly consists of all the photogrammetrists, remote sensing and spatial information organisations established for the purpose of considering issues of common interest, promoting regional cooperation, revising international standards and/or spatial information organisations established for the purpose of considering issues of common interest, promoting regional cooperation, revising international standards and representing the whole community of photogrammetrists, remote sensing and spatial information scientists.

ISPRS Book Series

The ISPRS Book Series is an initiative of the ISPRS Foundation, which is a non-profit foundation with the purpose of promoting international cooperation for the advancement of photogrammetry, remote sensing and spatial information sciences.

ISPRS Congress

Each ISPRS Congress is organized by one of the Member organisations. The Congress elected by the General Assembly consists of all the photogrammetrists, remote sensing and spatial information organisations established for the purpose of considering issues of common interest, promoting regional cooperation, revising international standards and representing the whole community of photogrammetrists, remote sensing and spatial information scientists.

ISPRS International Journal of Geo-Information

ISPRS International Journal of Geo-Information is the official journal of ISPRS, dealing with the scientific and technical issues related to geoinformation science, and especially with the advancement of photogrammetry, remote sensing and spatial information sciences in all its fields. It is one of the main reference points of the ISPRS and represents the whole community of photogrammetrists, remote sensing and spatial information scientists.

ISPRS Foundation

The ISPRS Foundation is a non-profit foundation with the purpose of promoting international cooperation for the advancement of photogrammetry, remote sensing and spatial information sciences.
The International Organisation for Standardisation (ISO).

sustained, excellent service to the ISPRS and its

The ISPRS Foundation

The ISPRS Foundation is a not-for-profit scientific and educational entity managed by a Board of Trustees, for the advancement of photogrammetry, remote sensing and spatial information sciences. The ISPRS Foundation has the following purposes:

- The ISPRS Foundation is an entity managed by a Board of Trustees for, but independent of, the ISPRS. The Board of Trustees is responsible for running the ISPRS Foundation, and the ISPRS is not involved in the association's management or financial affairs.
- The ISPRS Foundation is a separate entity from the ISPRS. The ISPRS Foundation is an independent, non-profit organization that focuses on supporting activities that are not directly related to the core work of the ISPRS.
- The ISPRS Foundation is a legal entity that is separate from the ISPRS. It has its own governance structure, financial statements, and legal responsibilities.
- The ISPRS Foundation is a separate legal entity with its own board of trustees and financial management. The ISPRS is a member of the ISPRS Foundation, but it is not a part of the ISPRS Foundation.
- The ISPRS Foundation is a non-profit organization that is separate from the ISPRS. It has its own board of directors, financial statements, and legal responsibilities.
- The ISPRS Foundation is a distinct legal entity with its own board of directors, financial statements, and legal responsibilities. It is a separate organization from the ISPRS and operates independently.
The International Society for Photogrammetry and Remote Sensing is a non-governmental organisation devoted to the development of international cooperation for the advancement of photogrammetry and remote sensing and their applications. The Society operates without any discrimination on grounds of nationality, religion, politics, race, or sex. It was established in 1910 by Professor Eduard Doležal from the Vienna University of Technology, Austria. ISPRS is the oldest international union organisation in its field, which may be summarised as addressing Information from Images.

Except for interruptions during World Wars I and II, the Society has continuously continued to grow and develop, especially in the activities concerned with computational and technical aspects of photogrammetry and remote sensing. The Congress includes the technical commissions, the commission on education and training, the commission on standards and the commission on the history of the society. The last commission, established in 2012, organises and promotes the development and dissemination of knowledge about photogrammetry, remote sensing, and related fields of study.

The Technical Commissions

The technical commissions are responsible for defining the state of the art and the future of techniques and their applications. Each Commission has several working groups which are responsible for particular topics within the Commission's areas of responsibility. Full details can be found in http://www.isprs.org/technical/commissions.html.

ISPRS Congresses

ISPRS Congresses are held every three years, and are organised by the Presidency of ISPRS. Each Congress has a number of scientific and commercial exhibits, meetings to conduct the business of the Society, and social programmes.

How does ISPRS Communicate?

Publications of ISPRS are in three series:

1. The International Archives of the Photogrammetry, Remote Sensing and Spatial Information Sciences is an official scientific periodical of ISPRS. It is a peer-reviewed scientific journal published biannually. It was established in 1910.

2. The ISPRS Journal of Photogrammetry and Remote Sensing is the official peer-reviewed journal of the Society on photogrammetry and remote sensing. It is published biannually.

3. The ISPRS Journal of Photogrammetry and Remote Sensing is the official peer-reviewed journal of the Society on photogrammetry and remote sensing. It is published biannually.
